

UQCS Annual General Meeting
Held on Thursday, 16th of October, 2025

Following these document is an Appendix containing, in the following order, the reports of the President, Secretary, Treasurer, Media Officer, Industry Officer, Event Officer, and the audit approval.

Meeting was opened at 5:19PM. Richard Yu chaired.

QUORUM

28 required. 32 attendees. Quorum met.

CONFIRMATION OF PREVIOUS MINUTES

Richard Yu motions to accept the 2024 SGM v2 minutes, Iain Jensen seconded.

Motion passes by majority vote.

Richard Yu concludes confirmation of previous general meeting minutes.

EXECUTIVE REPORTS

The president's report was given by Richard Yu. No further questions asked. Richard motioned to accept the report, Jimmy Dearlove objects, passes message on from Bradley that officers need to post their reports 72 hours before AGM. Richard motions to accept report, Masham Siddiqui seconded.

Motion passed by majority vote.

Secretary's report was given by Jesse Wang. No further questions asked. Jesse motioned to accept the report, Jimmy Dearlove objects, again passing on message that officers need to post their reports 72 hours before AGM. Jesse motioned to accept the report, Iain Jensen seconded.

Motion passes by majority vote.

Treasurer's report was given by Zain Al-Saffi.

He announced that The UQ Computing Society external audit for 2024-2025 passed and waiting on UQ Union audit.

Covers figures which can be found in the Treasurer's report in the appendix, and explains events expenses being 0 dollars due to counting it in catering..

Jimmy Dearlove asks about the stripe fees being 0 dollars. Zain explains membership fees - stripe. Jimmy comments it should be better to remove the stripe fees and events expenses since its misleading.

Zain motioned to accept the report, Masham seconded.

Motion passed by majority vote.

At 6:32 Richard motioned to adjourn meeting for 20 minutes to not starve, April Kidd seconded.

Motion passes by majority vote.

Iain Jensen motioned to unadjourn the meeting, Isaac Beh seconded

Motion passes by majority vote.

Meeting was adjourned at 7.00PM. Meeting was resumed at 7.25PM.

Media Officer's report was given by April Kidd.

April motioned to accept the report, Jimmy Dearlove seconded.

Motion passed by majority vote.

Event Officer's report was given by Tyreece Paul. Tyreece motioned to accept the report, Masham seconded.

Motion passed by majority vote.

Sponsors Officer's report was given by Masham Siddiqui.

Masham motioned to accept the report, Richard seconded.

Motion passes by majority vote.

APPOINTMENT OF RETURNING OFFICER & DISSOLUTION OF COMMITTEE

Jimmy Dearlove nominated for Returning Officer, (person) seconded. No other nominations were made from the floor. Bradley Stone was appointed as the Returning Officer.

The Returning Officer motioned to dissolve the current Management Committee, (person) seconded.

Motion passed by majority vote.

ELECTION OF COMMITTEE MEMBERS

Number of Management Committee members. Iain Jensen noted that the current general committee member, the current quorum for the AGM is (27) so the maximum of the committee member is then (13). Iain Jensen recommends that the number of committee members of (13) be continued for next year. Bradley Stone agrees and asks if anyone has any questions.

ELECTION OF OFFICE BEARERS

Creation of new officer positions. Isaac Beh proposes to create a Social Media Officer, Social Officer (or whatever it was called) and notes that this role is quite important.

Bradley Stone motions to create a Social Media Officer, Social's Officer (or whatever it was called). Iain Jensen seconded.

Majority Passes.

Isaac asks if there was an Industry Officer last year, and someone on the floor mentions there was. Isaac motions to create an Industry Officer, Iain Jensen seconded.

Majority Passes.

Jackie Chang proposes that we create an Events Officer, Isaac Beh questions what "events" are they actually involved with. Jackie Chang explains the significance, drawing examples from the 2023-2024 events, Isaac agrees. Iain Jensen seconded.

Majority Passes.

Number of Management Committee members. Jimmy motions to create (7) general committee member positions, Iain Jensen seconded.

Motion passed by majority vote.

Announcement and General Questions

- Iain made an announcement, commenting on the role of a committee member and its significance, noting that someone was voted in and dropped out within 24 hours in 2023-2024 committee.

- Several questions were asked in regard to committee members resigning and how each position could get nominated, these included officer positions where the remaining committee can nominate any committee for a role or call an SGM. This was answered by Bradley Stone.

NOMINATIONS BEGIN

President. One (1) valid nomination was made prior to the AGM: Zain Al-Saffi. No nominations were received from the floor.

Nominees:

- Zain Al-Saffi

Zain gave a speech.

Elected unopposed: Zain Al-Saffi

Secretary. One (1) valid nomination was made prior to the AGM: April Kidd. No nominations were received from the floor.

Nominees:

- April Kidd

April gave a speech.

Elected unopposed: April Kidd

Treasurer. Three (3) valid nomination was made prior to the AGM: April Kidd, Zain Al-Saffi and John Pioc. No nominations were received from the floor.

April Kidd and Zain Al-Saffi were removed from the nominees list as they have been elected Secretary and President respectively.

Nominees:

- John Pioc

John gave a speech.

Elected unopposed: John Pioc

Events Officer. Two (2) valid nominations were made prior to the AGM: Jevi Waugh and Clare Johnston. Jevi withdrew their nomination. No nominations were received from the floor.

Tyreece speaks about what an events officer entails.

Nominees:

- Clare Johnston

Clare gave a speech.

Elected unopposed: Clare Johnston.

Industry Officer. Three (3) valid nominations were made prior to the AGM: April Kidd, Clare Johnston and Jevi Waugh. No nominations were received from the floor.

April Kidd and Clare Johnston were removed from the nominees list as they have been elected Secretary and Events Officer respectively.

Nominees:

- Jevi Waugh

Jevi gave a speech.

Elected unopposed: Jevi Waugh.

Medias Officer. Two (2) valid nominations were made prior to the AGM: Richard Yu and Suvin Chin Chandran. No nominations were received from the floor.

April speaks about what a media officer entails. Masham and Harsha emphasises it's about creating graphics, descriptions, making the actual post etc. Jimmy speaks about it is an important role for keeping society informed about what is happening.

Nominees:

- Richard Yu
- Suvin Chin Chandran

The speeches were then given in the following order respectively.

No objections for Iain to help Jimmy count votes.

Elected: Richard Yu.

General Members of the Management Committee. Twelve (12) valid nominations were made prior to the AGM.

April Kidd and Richard Yu were removed from the nominees list as they have been elected Secretary and Medias Officer respectively. Henry Bui was removed as they withdraw via email prior to AGM.

There was two (2) nominations from the floor. The following nominations were received from the floor:

- Jason Jung nominates himself (Isaac seconded)
- Jayden Niddri nominates himself (Sean McLennan seconded)

Before speeches, Isaac asks for people to give their discord username and Iain asks for 1 serious question.

Nominees:

- Tyreece Paul
- Ryan Hurst
- Gideon McKinlay
- Sean McLennan
- Chris Meng
- Tristan Green
- Suvin Chin Chandran
- Sarthak Negi
- Faizan Ahmad
- Jason Jung
- Jayden Niddri

The nominees gave speeches in the above order. Tristan was not present. Faizan not here, Tyreece speaks on his behalf Jimmy plays submitted Sarthak video

No objections for Iain to help Jimmy count votes.

To give time for counting, Jimmy returns mic for Richard to continue with general business.

Richard Yu resumed the chair.

GENERAL BUSINESS / CONSTITUTIONAL AMENDMENTS

Jimmy asks about order; Richard confirms that it proceeds from oldest first.

PR #64. Draft Minutes Availability Jimmy speaks on behalf of the motion. No questions raised. No objections from the floor. Jimmy motions for this PR to be merged, seconded.

Motion passes by majority vote.

Clarification sought regarding whether this had already been passed in the last General Meeting (was confirmed not). Vote called. All in favour, none against, seconded.

Motion passes by majority vote.

PR #68. Change structure of exec removal: Serves to clarify how the endorsement of removal works. No one wished to speak on this PR. Iain queries Quinn regarding the wording of line 151 in `constitution.md`. All in favour, none against, some abstain.

Motion passes by majority vote.

PR #69. Lower proxy vote limit to one per person: Max Guppy speaks on behalf of `alegs-a`, advocating for lowering the proxy threshold to 1. Quinn comments on the C&S model proxy voting rules. Gideon asks about statistics on proxy numbers versus attendees. Iain raises concerns about wording, noting that proxies should represent long-term members who cannot attend, and suggests alternative measures such as extending the proxy period. Jimmy comments on alumni participation and their voice within the university context. Harsha raises the issue of distinguishing members and alumni, noting student number filtering could assist. Discussion follows on whether alumni votes should carry equal weight.

Jimmy asks whether to table or vote. Motion to vote moved by Jimmy, seconded by Gideon.

Majority abstained. Motion tabled for next General Meeting.

PR #70. Add Time Limits To General Meetings: Richard invites Bradley to speak on the PR. Bradley notes the AGM often runs long and the intent is to streamline meetings. April clarifies that “General Meeting” refers to both SGM and AGM. Jimmy questions the background and suggests tabling due to Bradley not remembering some of the details of the PR. Richard motions to table, seconded by Harsha.

Motion tabled by majority vote.

PR #48. Changes To Election Process Jimmy asks if Bradley wishes to withdraw the motion. Bradley states that while changes would be good, they should be discussed further. Jimmy recommends committee discussion at a later meeting. No further comments. Richard motions to table, seconded by April.

Motion tabled by majority vote.

PR #51. Withdrawn.

PR #59. Create `voting_puisne.py` Proposal to include the voting algorithm in the repository to assist future general meetings. No objections. Jimmy motions to merge, seconded by Quinn.

Motion passes by majority vote.

PR #60. Remove committee member Richard asks Jackie if he wishes to withdraw. Jackie declines, citing the issue’s ongoing importance. Iain motions to table, seconded by Jackie.

Motion tabled by majority vote.

PR #61. Pizza Clause: Several comments made in support of adding humour to the constitution. Max Guppy queries enforcement if the committee fails to meet this clause. Iain motions, seconded by Gideon. Bradley notes that as a legal document, technical non-compliance (e.g. donating to charity instead of pizza) could be interpreted literally. Jimmy motions to vote, seconded by April.

Motion fails — nays in majority. Withdrawn.

ANNOUNCEMENT OF GENERAL COMMITTEE

Meeting returned to the announcement of General Committee election results.

Elected: Chris Meng, Gideon McKinlay, Jason Jung, Ryan Hurst, Sean McLennan, Suvin Chin Chandran, Tyreece Paul

Jimmy formally recommends that the “Pizza Rule” be adopted as a standing committee rule. William Lowe seconded.

Motion passed by majority vote.

Richard motions to close the meeting, seconded by Gideon McKinlay.

Motion passed by majority vote.

Meeting was closed at 9:02 PM. Quorum was maintained (29 remaining).

LIST OF PROXIES

- Bradley Stone to James Dearlove
- Arthur Lin to Jia-Jie Dinh Chang
- Nhat Quang Dang to Jia-Jie Dinh Chang
- Alice Lesmes to Clare Johnston
- Jayden Phan to Ryan Hurst
- Alexander Arthur to Max Guppy
- Sonja McNeilly to Richard Yu
- Kevin (Guoyang) Luo to Richard Yu
- Cielo Nicolosi to April Kidd
- Mahalia Policar to Chris Meng
- Jasper Chong to Chris Meng
- Rex Ball to Jason Jung

UQCS Presidential Year in Review

Oh, what a year it has been. I am glad we made it to the end. I am also glad to announce that we have ended last SGM with 13 committee members and now we still have 13 committee members. It is feat that has not been achieved for a very long time. First allow me to tell you the story of my I started my UQCS journey. It all began at the 2023 market day and I by chance arrived at the UQCS tent. I have just finished all my Engineering courses and was seeking new connection in the computer science circle. Guarding the tent was tall man. His name I later found out is Conor Geissman. He then introduced me to the club, and I joined by tossing him a gold coin. That year I only to the BBQ event where I met the then treasurer Sonja, code jam and hackathon. The moment of fate came when I met Sonja at the redo room during a mutual friend group gathering. During a conversation she mentioned that I should run for next treasurer during the AGM. I was thrilled when I first hear the suggestion. But on the day of AGM I was having second thoughts as I have not anything CNS related. With the peer pressure of Miri and my friend Ary I ended up running and came out as the 2024 treasurer. I would never believe nearly 3 years later after talking to Conor I would be speaking at the AGM as the 2025 president.

Even as curtain falls on the 2025 committee, I will always remember these of years of my university life. I could not have led UQCS to its current success without the rest of the committee member standing with me side by side as step of the way. As someone who because a T3 in 2024 with 0 experience, I deeply appreciate the support the past and present committee has shown to me. UQCS has existed for 14 years as of now and no other societies has its members that share a stronger than we do and we have one person to blame, that is Jason Citron, the founder of discord.

2024 Objectives

The presidents always set us goals, missions and objectives when we are elected. You made also consider us as object oriented programmed.

1. Forster a strong bond within committee

I believe to work effectively as a team, we need every member of committee to feel comfortable with each. Hence, I engaged in funny conversations with committee in committee chill chat channel where we have casual and non-work-related conversations. This allows committee to get comfortable and know each other better and made some more proactive. I wanted everyone to see each other as friends and peers rather than colleagues that belonged in a hierarchical structure. When this approach most of new committee was able to adapt fast and started to get involved in event planning.

2. Increase the number of student talks

After receiving community feedback, UQCS aimed to host more student talk events. Hence during semester event planning we left many flexible weeks for students. We thank Max, Matt Young, Schom Gadd and Paul Vrbik for coming and educating our members on an interesting topic.

3. Increase and maintain engagement with other societies

Co-hosting events with other societies allow our member to meet people outside of UQCS. They could be meet people with other values, disciplines and hobbies other than computers. Engaging with other societies has brought new event ideas in UQCS which adds variety into

our weekly events and some members may find them to be a nice change of pace. Events hosted covers social, industry and technical. Since I became president, UQCS co-hosted 6 events with other societies, and this has led to a surplus amount of messenger group chats created and I had gotten in. We have co-hosted 2 drinking events with several societies, SIG Brain teaser with UQFintech, Trivia with UQFintech and UQRL, High Frequency Networking with UQLIT and EBESS and AllUni hackathon with several societies. We are always looking for more clubs to collaborate with. I do encourage next year UQCS strengthen our relationship with other societies as it will help to broaden our members social life and let UQCS name be more known.

Thanks

As I have mentioned at the beginning, my objectives could not have been completed without the existence of every 12 other committee members. As UQCS continues to grow and foster a supportive community for new and current members, I truly wish the future committee comprises of glamorous people like you guys. Whether you guys joined for the resume, radiance/aura or because you genuinely wish to be on the committee, I am glad to have met every one of you. Now I would like to personally thank you every one of you individually.

First, I wish to thank my favourite committee member, Naveed. I thank you for staying on the committee until the end very end. Your will is steadfast, and I respect that. I wish you best of luck on your hunt. Your hands are firm, and your aim is pure. I know you can land market on multiple targets, maybe at once. Next, I thank Harsha, David and Yuraj. Your help during the hackathon was the hackathon was irreplaceable. Next, I would like to thank Chris. You are the mailman of UQCS. You a lot of the leg work that no committee was willing to do such as picking up delivered items from the union building multiple times. If you love our Instagram design, then you must thank April and Anshul. Anshul created every post for events planned for semester one before they started. Not only had April designed most of our semester media, but she had also assisted with a lot before the stage planning. Next, Jesse. You're a very reliable person and I am very thankful that you are my secretary. You have flawlessly taken minutes during our meeting and executed tasks with high precision during all our events. Zain, not a dull day goes by with you in the committee. You have brought joy and light with your eccentric personality. Every time I open committee chill chat, I always learn a new vocabulary, or a new phrase or a new metaphor. On time of that you can preserve UQCS bank integrity. Next, I would like to thank an ex-committee, Jackie Chang. Even though things did not end as expected, I wish to acknowledge things you did for the society last year is irreplaceable. You tirelessly managed event logistics and emails behind the stage. You have taught me ins and outs of UQCS, and I remember staying up until 2am writing emails and working on event documents. Those were fun times. Please learn from your mistakes, have your chin up and keep walking forward because forward is where the finish line is. Best for last, Masham. I wish I have met you sooner and you have joined UQCS sooner. I have learnt many society skills from you. You have assisted me every step of the way and I appreciate the advice you have given me. You have helped me with UQCS during dire times.

Lastly, to continue with my long list of thank yous: Thank you to the society for having faith in me as your president and not throwing a second coup d'état.

To conclude the report, I'll leave you with this quote – "When drinking water, remember the one that dug the well". It means to gratitude for those who made your current benefits possible. This may not resonate with everyone, but it resonates with me. The reason I am here today is because my hard-working parents was able to send me to Australia 15 years ago. It is because they can send me to a great high school, and I was able to enrol in UQ and study engineering

and computer science. It is because my peers were there to support me when I ran for UQCS committee.

May the next UQCS committee bring peace, stability and economic and social prosperity to UQCS. With that my watch has ended. Cheers.

Lots of love,

Richard Yu
2025 UQCS President

UQCS Secretary Year in Review

I'd like to start by giving a big thank you to the UQCS community and the amazing 2025 committee members, both past and present. Many strange things happened (least of which was doing a handover with Tyreece past midnight), but we pulled through and delivered some fantastic events. I'm genuinely grateful for the opportunity to have served as Secretary for part of this year.

Event Collaborations

As per our yearly tradition, we once again collaborated with UQLIT and EBESS for HFN. This partnership is really positive and is definitely worth maintaining going forward. We also once again collaborated with UQLIT for the Mock Interviews Night event this year. It could be worth reaching out to see if they'd like to collaborate on their resume review event as well.

This year also saw more collaborations with UQRL and UQFinTech, thanks to several committee members being involved with those clubs or having close connections. These events turned out great and would be wonderful to continue, even with the incoming committee.

Our industry collaboration events this year were primarily with Fintech-focused companies. Taking inspiration from UQLIT, reaching out to more local sponsors for opportunities like office tours or mentoring sessions could help diversify our industry collaborations.

In previous years, we've stopped running joint events with clubs like MSS and UQ Cyber Squad. Reconnecting with them would be a great way to strengthen inter-club ties moving forward.

Direction of Club

An important point I want to highlight in this report is the direction the club is heading. As our community continues to grow, there's been an increasing demand for industry and networking-focused events.

This year, we dedicated more time to organising industry-related events, which I believe is a great direction for the club to take. However, we shouldn't forget that UQCS has always been about a love for programming, not just about getting a j*b. Having a few industry-focused events each semester worked really well, and I'd encourage future committees to maintain that balance.

While industry events generally attracted higher attendance than student talks, we should never overlook the importance of these. The future committee might consider experimenting with new formats to increase engagement. One idea we wanted to try but didn't get the chance to was running back-to-back talks (sort of like a "night of talks"), to make talk-style events more engaging and appealing to a broader range of members.

Lastly, I'd like to thank this year's committee once again and wish next year's committee the best of luck.

Jesse Wang
UQCS Secretary

Treasurer's Report

Finances Overview: UQCS successfully passed the external audit for the 2024–2025 financial year. The primary goal this term was to minimise overspending and avoid entering a deficit. We achieved this — recording a modest loss of only \$214.82, which is notably lower than previous years and close to our target of breaking even.

The year opened with a balance of \$27,895.29 and closed with \$27,680.47, comprising \$33,992.79 in income and \$34,207.61 in expenses. Purchases included catering and supplies for joint events (BBQs, Mock Interviews, Hackathon) and regular groceries such as cup noodles and Milo.

Income Summary:

- Sponsorship: \$19,999.27
- Events Income: \$10,409.10
- Grants: \$3,304.00
- Memberships: \$750.06
- Joint Events: \$244.91
- Merchandise Income: -\$714.55

Expenses Summary:

- Catering: \$19,571.43
- Prizes: \$5,250.00
- Pizza: \$3,912.32
- Merchandise Expenses: \$3,267.74
- Printing & Stationery: \$786.98
- Other (audit, marketing, etc.): \$419.00

Key Highlights:

- Achieved near break-even with a deficit of only \$214.82.
- Increased sponsorship revenue significantly, thanks to efforts by the Industry Officer.
- Improved financial tracking and categorisation for events and catering.

Challenges and Areas for Improvement:

- Hackathon Spending: Historically a major contributor to deficits. The increase in ticket prices was a necessary correction informed by sponsorship levels and CPI adjustments.
- Budget Planning: Greater structure in setting an emergency fund could improve flexibility during large events.

Treasurer's Advice: Establish a fixed Excel-based budget that includes a buffer for overspending during large-scale events such as Hackathon. Future committees should use the existing pricing model as a baseline heuristic when determining event ticket pricing, and collaborate closely with the Industry Officer to explore increasing sponsorship package rates.

Treasurer's Remarks: Although the year began with challenges, it concluded successfully. I am grateful to have served as Treasurer and proud of what our committee achieved.

Special thanks go to:

- **Masham** — for her exceptional effort in securing record sponsorships and maintaining committee stability.
- **Richard** — for his leadership and mentorship in creating an inclusive and supportive environment.
- **Jesse** — for his consistency and organisation as Secretary, ensuring smooth operations.
- **April** — for her creativity and dedication in producing excellent media work.
- **Tyreece** — for bringing energy and humour to the committee (despite the room booking chaos).
- **The General Committee** — for their reliability and commitment, especially **Yuvraj** for his dedication in difficult circumstances.

Finally, thank you to the UQCS cohort — without you, there would be no UQ Computing Society.

Sincerely,

Zain Al-Saffi
UQCS Treasurer

Industry Officer – Masham Siddiqui

Firstly, I was trying to see on GitHub what I could base my report on, but there really wasn't much for Industry Officer reports. So here I am, writing my own structure from scratch. I believe this year I reshaped what the Industry Officer role looks like and how our sponsorship structure works. So really, it makes sense that I am building from scratch what could be the basis of Industry Officer reports in the future.

Overview

This year was about sharpening the role after a proper look at how it ran in past years. I introduced an **Emerald tier**, lifted the base package price, and rebuilt the prospectus to be clearer and more accurate, with a full page on CPG so sponsors can see the competitive programming stream. I kept a live, always-updated document with our calendar and open slots so partners could plan without back and forth. Above all, I was deliberate in how I ran sponsorship conversations and events so the value was obvious on both sides.

Sponsorship Snapshot

Tier	Company	Amount
Emerald	Boeing	\$3,081.66
Emerald	Technology One	\$3,000.00
Emerald	Oracle	\$3,000.00
Emerald	Jane Street	\$3,000.00
Gold	Swyftx	\$2,500.00
Gold	JR Academy	\$2,500.00
Silver	SIG	\$2,000.00
Silver	Optiver (Bespoke)	\$1,500.00
Bronze	VivCourt	\$1,000.00
Bronze	IMC	\$1,000.00
Total		\$22,581.66

Additional in-kind support came from the Australian Computer Society, Red Bull, and Ciao Bello.

How it Compares

Year	2025	2024	2023	2022	2021	2020	2019
Total (\$)	22,581.66	15,500.00	22,467.25	30,721.74	33,217.32	12,276.15	18,690.95

That's a 45.7% increase from 2024. It's roughly level with 2023, but still below the 2021 to 2022 peak when tech companies were sponsoring more often. The job market is slowly recovering, but that is not what drove this. Most sponsors returned. The lift came from initiative, clearer documents, and early planning. Changing how the packages looked, and the pricing, helped too. I sent my first sponsorship email in October 2024, which is early for most companies that are only just starting to plan next year's budgets for early careers and campus work.

What Changed and Why

Emerald tier: Basically the old Gold tier reimaged. Emerald took the previous Gold price, and Gold moved down in price. I shifted the focus toward access and exposure. The Bronze and Silver tiers also increased in price.

Prospectus refresh: Removed filler, added real examples, and gave **CPG** a full page to emphasise the UQCS competitive programming side.

Live sponsor doc: A rolling calendar with event slots, FAQs, and status notes. Sponsors could check it anytime without waiting for replies.

Follow-ups: I made sure sponsors actually used their benefits. It might sound simple, but I noticed that when inclusions went unused, sponsors often did not return or dropped a tier. A few even mentioned it was because they had not used everything last time, whether by choice or just forgetting. So this year I sent kind reminders about remaining benefits to show that we notice and value their support. It is a small thing that builds trust, helps maintain the relationship, supports UQCS in the long run, and keeps my outward presence professional.

Outreach and Relationships

I started outreach about a month after AGM and honestly just grinded through it. Short, direct emails, most even before I had the prospectus finalised, just to gauge early interest. It's a good place to start, especially since exams run through mid to late November. I also had a fair few calls with sponsors, which really helped. I found that sponsors I spoke to over calls generally felt more trust, especially if they were unsure which package to choose.

A few highlights:

- **IMC Trading** sponsored CodeJam again.
- **Technology1** moved from one-off event support to a full sponsorship tier (Emerald, the highest one).
- **Red Bull** sponsored both CodeJam and Hackathon.
- **Amazon** and **Canva** joined us at key events like Mock Interviews, Industry Panel, and High Frequency Networking. Amazon also helped judge Hackathon.
- The **First Year Guide** was upgraded this year (reintroduced after a few years). Emerald sponsors had full-page ads, while the other tiers still got space but smaller mentions. The guide should continue evolving each year to represent the current sponsors and incoming committee.

Events that Stood Out

Industry Panel at The Precinct. I brought the Industry Panel back this year but ran it off-campus at The Precinct in Fortitude Valley. The **Australian Computer Society** sponsored the venue and, as of this year, is a full-year sponsor (just not monetarily). Their partnership with us offers the venue once a year as one of their benefits and provides memberships to all UQCS members, which was great. Industry Panel sold 104 tickets and featured speakers from **Amazon, Oracle, VivCourt, Boeing, and Swyftx**. Technology1 also attended as an industry representative, alongside a few others from the panel companies. I MC'd and ran the Q&A too!

HFT collabs: Jane Street and Susquehanna were both incredible to work with. The Brain-teaser Battle with UQ FinTech, the Jane Street Estimathon, and their pop-up were all great events. I will say, we now have an excess of merch from that pop-up that the storeroom might take years to recover from.

Comms and Consistency

All job listings and sponsor announcements went through our main socials (Instagram, Facebook, and Discord) to keep everything centralised. It worked well and made sponsor visibility much easier to track. If I had more time (and something I'd recommend to next year's committee), I would've mirrored those posts on the website. A few people mentioned to me that they mainly check the website for updates, and while it already shows upcoming events, it would be nice to have job opportunities listed there too.

Social sponsors were a smaller focus but still worth pursuing. We brought on Red Bull as a proper sponsor this year and added Ciao Bello's 10% discount (huge thanks to Zain for that). The next step would be introducing digital membership cards so social sponsors can easily verify UQCS members, since membership verification is often a requirement for them. I'd avoid physical cards, as they would be difficult to manage long term and would make it harder for members who join throughout the year to access their benefits right away.

I also co-ran the "Getting the Grad or Internship" and "Cracking the Behavioural" sessions with Zain. It was nice to share insight and just have genuine conversations about what actually works (and what doesn't).

For Whoever Comes Next

- Build a simple sponsor hub on the website. Even a basic one helps.
- Push for digital membership cards to make social sponsors actually workable.
- Keep the Emerald tier exclusive and high-value. Check in mid-year (for semester-long packages) and adjust benefits if needed. Communicate with the Treasurer to see if the overall packages need to be priced differently after reflecting on logistics and financials from the past year.

Thank You

This role is a lot of work, but it's also a privilege. Massive thanks to **Richard** for the late-night logistics chats and helping me through the crashouts, **Jesse** for always showing up, keeping brilliant minutes, and doing the pizza runs with me, and **Zain** for co-hosting events and helping with sponsors. To the rest of the committee: thank you for the laughs between tasks, the late-night debriefs that somehow made the workload feel lighter, and for building a space that wasn't just about finishing jobs off. It felt like the perfect balance between friends and teammates.

As my time at uni wraps up very soon, it is a bit bittersweet. I have been in clubs for so long that stepping away feels strange, but I am glad I chose to be in UQCS for my final year. Thanks for making it the right place to finish the run.

Signing out for 2025

Masham Siddiqui
UQCS Industry Officer

Media Officer's Review

Facebook: Engagement mainly coming from Instagram reposts and stories, but remains relatively consistent.

Instagram: Followers increased from 2,771 as of the last AGM to 4,669 as of the 12th of October. Started posting reels with good engagement.

Discord: Had an increase of roughly 400 members from last year, with a 40% new member retention.

Linktree: 3.38k views and 73.8% click rate since introduction, great addition from last year's committee.

LinkedIn: Still haven't posted here. It could be good to do next year for industry events or student talk recaps.

Key Milestones:

- Over 4,500 followers on Instagram
- Discord member count is closing in on 2.5k

Issues and Areas for Improvement:

- Throughout the 2025 committee, we had 3 changes in who was Media Officer, with myself being the most recent as of late August. This, naturally, caused issues throughout the year with performance and continuity.
- A more structured media development lifecycle could improve outcomes and speed up turnaround. Something to explore in future.

Overall, an incredible year, and an absolutely delightful team to work with. Thank you all!

April Kidd

UQCS Media Officer

Events Officer Review

Events Overview: UQCS flagship events (Codejam, Hackathon, HFN, Mock Interviews) reached impressive turnout rates and were overall highly successful. Industry Panel was reintroduced which also saw high attendance.

Key Highlights:

- Industry Panel: Strong attendance (104 participants), served as solid opening event.
- Codejam: Lower turnouts than previous year (69 participants), following decline in attendance from previous years.
- Mock Interviews: Lower turnout than previous year (52 attendees) but close to max capacity.
- Hackathon: Sold out event (180 attendees), consistent with previous years.
- HFN: Another sold out event (124 participants), improved venue allowed for larger attendee capacity.

Strong social events with standouts being Semester 1 EOS (99 Attendees), Semester 2 Launch Party (55 Attendees) and Trivia (68 Attendees). Built very good tradition of having 1st year friendly events (student talks, 1st year panel), with strong turnout. Collaboration events with UQLit continued to be really good, with other significant collaboration partners including UQRL, UQIES and UQFintech. Solid sponsor event lineup.

Challenges and Areas for Improvement

- Disruption: Midyear changes within the leadership team led to some challenges in continuity and planning. While momentum was maintained, the transition period created short-term disruption.
- Event Scheduling: Toward the latter half of the year, multiple events were concentrated within a short timeframe. Going forward, we could improve by spacing out activities more evenly and ensuring a broader variety of events are distributed throughout the year to maximise engagement.

Overall, this period proved successful and our committee worked together to overcome challenges faced.

Tyreece Paul
UQCS Events Officer
