UQCS Annual General Meeting

Held on Thursday, 22nd of October, 2026

Following this document is an Appendix containing, in the following order, the reports of the President, Secretary, Treasurer, Events Officer, Media Officer, and Industry Officer, and the audit approval.

Meeting was **opened** at 6:21PM. Zain Al-Saffi chaired, as agreed by the members present.

The society thanks Bradley Stone for his benevolence in not kicking UQCS out of his room booking, which the meeting had intruded upon.

Quorum

26 required. 38 attendees. Quorum met.

Confirmation of Previous Minutes & Matters Arising

April Kidd motioned to accept the 2025 AGM minutes. Gideon McKinlay objected and asked whether this referred to the minutes in the pull request or the previous version. April clarified that it referred to the minutes in the pull request. April motioned again, James Dearlove seconded.

Motion passed by majority vote.

Executive Reports

The President's report was given by Zain Al-Saffi. Zain summarised his report, gave highlights and his favourite moments from the year, and thanked several members of the committee. Zain motioned to accept the report, April seconded.

Motion passed by majority vote.

The Secretary's report was given by April Kidd. April summarised her report, gave highlights and her favourite moments from the year, thanked the committee, and shared some quotes from Taylor Manderson.

James Dearlove asked what the longest and shortest committee meetings were. April estimated 30 to 90 minutes. Gideon asked what the shortest notice given for a meeting was. April asked not to answer the question, and Gideon clarified that it was 22 hours. April motioned to accept the report, Taylor Manderson seconded.

Motion passed by majority vote.

The Treasurer's report was given by John Pioc. John gave a brief explanation of his report and explained that some figures were in deficit because invoices were completed late. John thanked the committee.

A member asked what the sundry purchases included. John explained that it covered all purchases not falling under the other categories. Jamie Landolt asked why the total profit had no minus sign despite being a loss. John explained that this is how a loss is formatted in accounting. James Dearlove began to ask a question but withdrew it.

John motioned to accept the report, Zain seconded.

Motion passed by majority vote.

The Events Officer's report was given by Clare Johnston. Clare presented statistics on the increase in events run this year and a breakdown of event types. Clare recommended more relaxed social events targeting first years and newcomers, and thanked the committee.

James asked Clare her favourite event. Clare answered Bouldering and Beers. Clare motioned to accept the report, April seconded.

Motion passed by majority vote.

The Media Officer's report was given by Tyreece Paul. Tyreece gave an off-the-cuff speech covering the media subcommittee structure created over the past year, the media ticketing system, and the first year guide, which he plans to repeat if on committee next year. Tyreece presented metrics for Instagram, Discord, YouTube, and LinkedIn.

Sean McLennan asked what some of the statistics on the slides meant, and Tyreece clarified. Bradley Stone asked whether email campaigns were used. Tyreece clarified that email was only used through the EAIT newsletter. Tyreece motioned to accept the report, April seconded.

Motion passed by majority vote.

The Industry Officer's report was given by Jevi Waugh. Jevi presented statistics for the industry portfolio, showing that both sponsor outreach and sponsorship income were higher than in previous years. Jevi stressed the importance of outreach to the society and "the art of selling", and presented a breakdown of sponsorship income by sponsor and the society's social sponsors.

Jevi motioned to accept the report, Tyreece seconded.

Motion passed by majority vote.

Appointment of Returning Officer

Zain nominated Taylor Manderson for Returning Officer, April seconded.

Motion passed by majority vote.

Taylor Manderson was appointed as the Returning Officer. James Dearlove assisted the Returning Officer with counting votes.

Committee Structure

Creation of new officer positions. April motioned to create five (5) officer positions: Media Officer, Industry Officer, Social Officer, Competitions Officer, and Infrastructure Officer. Taylor seconded.

Motion passed by majority vote.

Number of General Committee members. April motioned to create zero (0) General Committee member positions. Gideon proposed one (1) General Committee member, then withdrew the proposal. Taylor seconded.

Motion passed by majority vote.

Announcement and Dissolution of Committee

The Returning Officer motioned to dissolve the current Management Committee, April seconded.

Motion passed by majority vote.

Nominations Begin

One nomination form, for Quoc Bao Huynh, did not include the nominee's name, so it was not listed on the slides or counted below. Quoc Bao did not contest this or make himself known at the meeting, and gave no speeches.

President. One (1) valid nomination was made prior to the AGM: John Pioc. Zain explained the role of President. The following nominations were received from the floor:

- Bradley Stone nominated James Dearlove. Ruled out of order, as James is not a student of the University of Queensland.

Nominees:

- John Pioc

Elected unopposed: John Pioc.

John gave a short speech after being elected.

Secretary. Two (2) valid nominations were made prior to the AGM: April Kidd and Abdallah Azazy. April explained the role of Secretary. The following nominations were received from the floor:

- John Pioc nominated Mary Barrell (Clare seconded). Mary accepted.
- Tyreece nominated William Lowe. No seconder.

Abdallah Azazy withdrew his nomination and gave his support to Mary.

Nominees:

- April Kidd
- Mary Barrell

The speeches were then given in the above order, followed by questions. Bradley asked April whether she would abide by the code of conduct in 2027. April said "no".

Elected: April Kidd, 36 votes to 29.

Treasurer. Two (2) valid nominations were made prior to the AGM: Zain Al-Saffi and Abdallah Azazy. John explained the role of Treasurer. The following nominations were received from the floor:

- Clare nominated Amna Arshad (Jamie Landolt seconded). Amna accepted.

Nominees:

- Zain Al-Saffi
- Abdallah Azazy
- Amna Arshad

The speeches were then given in the above order, followed by questions.

Elected: Zain Al-Saffi, with 33 votes to Amna's 26 and Abdallah's 7.

Media Officer. Four (4) valid nominations were made prior to the AGM: Tyreece Paul, Chloe Lim, Mary Barrell, and Ben Springall. Tyreece explained the role of Media Officer. Zain noted that Ben Springall was not running despite appearing on the slide. The following nominations were received from the floor:

- Bradley nominated James Dearlove. James declined.
- Gideon nominated Bradley. Bradley declined.

Chloe Lim withdrew her nomination and attempted to give her support to Mary, but was cut off by the Returning Officer as she was no longer a candidate.

Nominees:

- Tyreece Paul
- Mary Barrell

The speeches were then given in the above order, followed by questions.

Elected: Mary Barrell, 33 votes to 31.

Industry Officer. Five (5) valid nominations were made prior to the AGM: Tyreece Paul, Rio O'Dwyer, Youssef Hassan, Ben Springall, and Massimo Spadaro. Tyreece Paul and Rio O'Dwyer withdrew their nominations. Jevi explained the role of Industry Officer. The following nominations were received from the floor:

- Suvin Chin Chandran nominated William Lowe (Bradley seconded). William declined.

Nominees:

- Youssef Hassan
- Massimo Spadaro (not present)
- Ben Springall (not present)

Youssef gave a speech, followed by questions. Massimo and Ben were not present and did not give speeches. During questions, Zain noted that the society keeps a sponsor blacklist. Eris Paul asked whether it is public. April said it is not, as the reasons behind it are not public.

Elected: Youssef Hassan, with 64 votes, 1 for Massimo, and 1 abstention.

Social Officer. Four (4) valid nominations were made prior to the AGM: Rio O'Dwyer, Ben Springall, Pascal Khosrotehrani, and Sean McLennan. Ben Springall and Pascal Khosrotehrani were not present. Clare explained the role of Social Officer. The following nominations were received from the floor:

- Clare nominated Chloe Lim (Mary seconded). Chloe accepted.

Sean McLennan withdrew his nomination.

Nominees:

- Rio O'Dwyer
- Chloe Lim

The speeches were then given in the above order, followed by questions.

Elected: Rio O'Dwyer, 33 votes to 28.

Competitions Officer. Five (5) valid nominations were made prior to the AGM: Tyreece Paul, Peter Ma, Sid Malik, Sean McLennan, and Aadi Rai. Tyreece and Amy Hu explained the role of Competitions Officer. The following nominations were received from the floor:

- Chloe nominated Amy Hu (Gideon seconded). Amy declined.

Peter Ma withdrew his nomination.

Nominees:

- Tyreece Paul
- Sean McLennan
- Sid Malik
- Aadi Rai

The speeches were then given in the above order, followed by questions. Jevi raised that Sid had said at the UQ Fintech AGM that UQCS was not approachable. Sid clarified that he had misspoken, and was referring to UQ Fintech. Amy commented that CPG should have Gmail access, as reaching contacts is currently difficult.

First preferences were Tyreece 23, Sean 18, Aadi 14, and Sid 3. Sid was excluded, with 2 preferences going to Tyreece and 1 to Aadi (Tyreece 25, Sean 18, Aadi 15). Aadi was excluded, with 6 preferences going to Tyreece, 5 to Sean, and 4 exhausted.

Elected: Tyreece Paul, 31 votes to 23.

Infrastructure Officer. Four (4) valid nominations were made prior to the AGM: Peter Ma, Hayden Brown, Abdallah Azazy, and Aadi Rai. April explained the role of Infrastructure Officer. Aadi Rai withdrew his nomination.

Nominees:

- Hayden Brown
- Abdallah Azazy
- Peter Ma

The speeches were then given in the above order, followed by questions.

First preferences were Hayden 26, Abdallah 23, and Peter 13. Peter was excluded, with 8 preferences going to Abdallah and 5 to Hayden, leaving Hayden and Abdallah tied at 31 votes each. The vote was redone between Hayden and Abdallah only.

Elected: Hayden Brown, 33 votes to 27.

General Business / Constitutional Amendments

Bradley requested that PR #48 be moved to the end of general business.

PR #60. Remove committee member. James moved a procedural motion to put the PR to an immediate vote, William seconded.

Procedural motion passed by majority vote.

James moved to accept the PR, Hayden seconded.

Motion failed to reach a two-thirds majority.

PR #63. Let me cook v2. Bradley moved a procedural motion to put the PR to an immediate vote, April seconded.

Procedural motion passed by majority vote.

James moved to accept the PR, William seconded.

Motion failed to reach a two-thirds majority.

PR #69. Lower proxy vote limit to one per person. Eris Paul spoke on and explained the PR. Tyreece expressed agreement. Zain thought proxies should stay the same, with a longer membership requirement. April disagreed for the sake of logistics. Bradley noted that this is already intentional. Gideon noted that the change should not take effect until after this meeting. Taylor motioned to delay implementation of the PR until after the current meeting, April seconded.

Motion passed by majority vote.

April motioned to accept the PR, Taylor seconded.

Motion passed by two-thirds majority.

PR #70. Add Time Limits To General Meetings. James explained the PR. Gideon spoke in support, stating it would not cause issues. Taylor motioned to delay implementation of the PR until after the current meeting, William seconded.

Motion passed by majority vote.

April motioned to accept the PR, Taylor seconded.

Motion passed by two-thirds majority.

PR #71. Committee Restructure. April withdrew the PR.

Withdrawn.

PR #72. Revert Incorrectly Removed Clauses. James motioned to accept the PR, April seconded.

Motion passed by majority vote.

PR #74. Codifying de facto UQCS Policy. James motioned to accept the PR, Taylor seconded. April directed a "fuck you" to Bradley.

Motion failed.

PR #48. Changes To Election Process. (Moved from the start of general business.) Gideon and April thought it should be struck down. Bradley thought it should be tabled. James motioned to accept the PR, Taylor seconded.

Motion failed.

Close

Zain motioned to close the meeting, Taylor seconded.

Motion passed by majority vote.

Meeting was **closed** at 10:20PM. Quorum was maintained.

List of Proxies

- Xavier Alderson to Benjamin Cuffe
- Devyn Ramos to Pascal Khosrotehrani
- Kait Lam to Eris Paul
- Farzad Hayat to Chloe Lim
- Muhammad Aniq Idris Bin Ahmad to Mary Barrell
- Zwe Maung to Alice Lesmes
- Cian Casey to John Pioc
- Kiara Zhu to Gideon McKinlay
- Arya Patel to Peter Ma
- Ainslie Colton to Clare Johnston
- Daniel Zhu to Zain Al-Saffi
- Noel Karayampully to Mary Barrell
- Isabel Barton to Pascal Khosrotehrani
- Rafael Chase to Rio O'Dwyer
- Ashleigh Locke to Zain Al-Saffi
- Ryan Wang to Jevi Waugh
- Claudia McPherson to Jevi Waugh
- Ash Kaster to Peter Ma
- Jamie Williams to Tyreece Paul
- Kiana Paul to Tyreece Paul
- Bond Tran to Sean McLennan
- Jamie Landolt to Josh Mann (notified the Secretary on leaving, 8:32PM)
- Max Guppy to Eris Paul (notified the Secretary on leaving, 9:22PM)

UQCS Presidential Year in Review

How do I start this off? Maybe by saying this might be the best year UQCS has ever had? Honestly, what an insane year we had, and for me to tell you all about it I have to start with my journey. I joined UQCS at the end of 2024 after first thinking this society was too nerdy for me, and to be honest I was a bit disappointed seeing UQCS in the state it was in, especially since I had gotten used to being around CSESoc at UNSW. But then I started playing basketball socially and met my now pookie Connor. I was then encouraged to join general committee, survived the great turbulent coup era of sem 1 2025, filled in as treasurer at the 2025 SGM, and finally decided I wanted to give it my all as President this year.

We started this year with simply one goal: "Do everything that we do, but amp it up to 100 %, win at any cost and make everyone smile". I modelled that after how I approached university life. As many of you know, I have a habit of doing everything at once, being everywhere at once and winning at any and all costs. In theory that makes me better than The Flash, but I wish I could think at super speed. Even without super speed, what does that actually look like? Well, we doubled everything and we listened to the people.

1. **Double the hackathons/competitions**
   We introduced GameJam this year. We realised there was no love for game development in Queensland, so we partnered with most of the major tech societies in SEQ to deliver an unforgettable hackathon. Let's not forget our signature hackathon in semester 2, where we managed to drop ticket prices, sell out as usual and ultimately have the highest sponsor attendance and the most fun in UQCS's history. We also had a very good turnout and engagement at the AllUni event, keeping CPG alive and well. We paid more attention to the CPG Subcom this year to give CPG the attention it deserves, and through it we began sending UQ teams to participate in ICPC with sponsorship from the faculty. Thank you Amy for nurturing your subcom.

2. **Double the social events**
   We wanted to increase the number of social events this year as there was a massive lack of them. We introduced the Beers series, where we take part in a fun activity with a fun subsidised beverage on the side. We had heaps of fun running Bouldering, Bowling and Bouncing and Beers. Outside of that we also had our Mega Launch events, where we participated in the wildest parties of the year, and we hope to turn up the heat even more next year. Let's not forget about our Las Vegas Ball and the Science Ball, where UQCS Band made their debut and we became one of the only UQ societies to do two balls in one year (take that as you will). We also wanted to explore contributing to charitable causes, in which we partnered with Social Runners Club for R U Okay Day Run, and with UQ Fintech for Charity Poker in which $ 4500 in donations went to fight breast cancer.

3. **Double the industry events and income**
   Don't get me started on this. Every company under the sun wanted to participate in our mission this year, and as a result we delivered some packed industry events and connections, most notably the Industry Panel, the High Frequency Networking Night and the Quantum Careers Panel. Our members got to put faces to the companies they want to work for, and those companies got to see firsthand what UQCS is made of.

4. **Double the academia events**
   We really wanted to pay attention to this and allow students to participate more on the academic side. So we increased the number of student talks this year, and instead of compromising on talks to focus on other events we put more pressure on ourselves to run two events a week and keep everyone happy. We also introduced lightning talks and 2 hour workshop formats to give speakers more flexibility in their delivery. We also put a lot of work into the First Year Guide to ease the transition into university for first years, as well as running the What is CS event that allowed not only current students but future students to explore the joyous world of computer science.

Furthermore, we reinstated UQCS Band this year and had really good success performing at the

Science Ball. I was honestly surprised by the reception of our music and I was happy we were able to provide a good experience for everyone. I hope to continue this initiative next year as we have been getting good interest in our performances. I have had really good fun not only playing in that band but managing it. Thank you Charlie, Lehan, Nick and my lovely Ashleigh for performing with me.

Moreover, I really focused as President on improving our relationships with other societies and expanding our network. This started with GameJam when we partnered with tech societies across SEQ, predominantly UQLIT, QUTRL, UQRL, QUT CN, QUT GDC and UQ Fintech. We decided to expand outside of tech too, partnering with UQBA for the Tech Careers Panel, and we hope to continue our relationship with them. We also rekindled our relationships with all the science societies (UQ Biotech, UQ SSS, PAIN, UQCC, UQFSC, UQ ABS) by rejoining the Science Ball, which we aim to keep as a tradition alongside the collaborating societies. We are also expanding more towards the engineering side by partnering more with EUS sub societies and growing the tech scene together. On that topic, we also significantly improved our relationship with the EAIT faculty, fostering events in collaboration with lecturers and the student experience team! Let's not forget about Ventures. We began partnering with them more to hopefully give more visibility to students looking to start their own venture or work in one. None of this shows up in a photo dump, but it is honestly the job. A president who only runs the inside of the club is a really just a good secretary.

Closing Remarks and Thank Yous

Overall, I was honestly surprised I was able to juggle this role while doing 4 courses a semester, 4 internships, research work at UQ, managing a metal band, DJing and still making time for my girl and my friends. I wouldn't have been able to do any of it without the team behind me, so this is the recognition they deserve.

Let's start with John. Seeing you go straight into treasurer proved to be a learning experience, but man, you executed it well. I couldn't have asked for anyone better to be by my side and I loved how effortless it was for us to work together. Outside of that you're honestly just a good bloke in general who has clearly been raised by good parents. You have the ability to think fairly, weigh up compromises and differing opinions in a very calm manner and be very mature about it. You are someone who genuinely holds kindness in their heart, sees the best in people and nurtures them to be the best versions of themselves. Not only that, you're a natural amplifier who uplifts everyone's mood and has the natural ability to be a leader. A good quality for a future president. From meeting you at that coffee chat in first year to now standing by my side, I have never seen someone grow quite like you, and I hope that when you reflect on your past experiences you are happy with the man you have become. I appreciate you man.

To April, you have gotten fatter over the years but also sweeter (you are what you eat after all). I honestly loved mentoring you in first year, and seeing how far you have grown since then has been amazing. You, like John, are my ride or die. You care a lot about your friends, you give them the time of day and make them feel seen. You have been through a lot and yet you still manage to not only keep your chin up but juggle all your commitments on top of that (I hope I wasn't a bad influence on that part). I admired your ability to work diligently and handle the internal affairs of the society, even though you suffer from goldfish memory syndrome. I haven't met many people who can match how unhinged I can be, and I'm glad to call you my friend and can't wait to see what you become in future years. I thank the both of you for being able to handle my hot headed nature and for helping me learn ways to manage it. I tried my hardest to make every call for the society and not for Zain, and you two were the ones who pulled me up when I didn't.

To Jevi, this would not have happened without you. It is incredibly rare to see people in CS who have as much ambition as you and are able to walk the talk. In an age of larpers you set yourself a high bar and went past it, balancing your commitments and executing probably the largest sponsorship income in the society's history. It is going to be very difficult without you, so please give the best handover

you can, as you have set a bar that's going to scare a lot of people away but hopefully also motivate them to tackle a challenging problem. You are also an incredibly reliable friend. You are caring, honest and truthful and you look out for your mates. You have the ability to remove emotion from decisions and choose the best outcome for the committee and the members. All the best in Germany mate, and bring us back some souvenirs (not to be confused with our rubbish officer Suvin).

To Clare, thank you for your diligent work as events officer, especially given how terrible the new rules around room bookings were this year. We owe it to you for the incredible work you did to help us plan our events and bring up the social aspect of UQCS. I hope whoever takes your role is as much of an alcoholic as you, as we will need that energy, and equally has the most intimidating death stare I've seen in my life. You should definitely pick up poker, as I don't think the pros would be able to bluff against that face at all.

To Tyreece, I remember the days you couldn't follow simple instructions and give me an itemised bill. Those days are long gone. You have put pressure on yourself to be better, and I could not have asked for a better media officer. It took you a while to get adjusted to a leadership role, but you led your media subcom well, and we have had really good media output this year. You adapted, learnt and ultimately executed a good year in media. You know it is a good year when people want to larp hackathon and GameJam merch. Thank you for everything you have done and I hope whoever takes media next year can match the level of output and attention to detail you have put in this year.

To general committee, thank you so much for showing up every week, setting up AV and helping us keep this society going. A committee has to actually be tight, not just look tight, and this one was. Special shout out to the Larp Legend and rubbish officer Suvin for changing his startup ideas more often than I change my underwear.

To the future president and committee, I have set a high bar for you, and it is going to be incredibly difficult not only to meet it but to surpass it. So here is what the role actually takes. Keep the outside in order, keep your biases out of it and keep your people together. Do those three things and the events sort themselves out.

One more piece of advice: talent attracts talent. The face of this society can't be someone who just coasts. Whoever holds this title should be the person first years hear about and think "I want to get there one day." Build a reputation that goes beyond UQ, carry yourself like you belong at the top, and you'll notice people start lifting their own standards to stay on the same ship as you. Lead by example, but also build your own portfolio. Be someone people want to meet and work with, and give the younger years something to chase. If the president is worth following, the rest of the committee follows and industry partners will want to be a part of your story.

I have a bad habit of quoting from anime, but in the words of Aomine Daiki

The only one who can beat me is me

I hope you can prove me wrong, because that would mean a better tomorrow for our members. Be the face of tech in Queensland and make this a place people want to come to after a long day of lectures.

Finally, to every single member who showed up this year. To the people who came to a talk after a long day of lectures, grinded long nights at the hackathon, got way too competitive at Bowling and Beers or just hung around to chat. None of this means anything without you. Every packed room this year was because of you, and every sponsor who wants to come back next year is because of how you showed up. You are UQCS, and it has been the honour of my degree to serve you.

Alumni loves to talk about the golden era, and here we bring you the beginning of a new dynasty that supersedes it. We hope those that come after us continue to put a smile on our members faces.

Yours faithfully,
Zain Al-Saffi
2026 UQCS President

UQCS Secretary's Year in Review

I'd like to open by giving a huge thank you to the UQCS community as a whole. This year has been absolutely incredible, and it wouldn't be possible without all of you turning up to huge events, eating pizza at student talks, and shitposting on the Discord. This year has been one the largest in the society's history in every way, and all of you in the community are to thank. I appreciate you all putting your faith in me and allowing me to be Secretary for 2026.

Collaborations

As Zain mentioned, we all went into this year wanting to bring our best to UQCS and ensuring that every single member of the society had something brought to them that they would enjoy. We maintained close relationships with societies we've run events with before, such as UQ LIT and UQ Fintech, and continued to expand our close network to other societies like UQ Skirts, UQ BA, UQFT, and others by running more extensive collaborative events. In future, I'd love to see us strengthen ties with some of the other large clubs at UQ like EUS to bring even larger events to our community and ensure everyone can feel welcome and supported, regardless of their degree background, if they're interested in computing.

Competitive Programming

We have continued to push for more interest and support to be given to CPG, and have even seen our UQ team make it to regionals for ICPC! Seeing the community for competitive programming at UQ thrive and grow has been something I've loved seeing and supporting for the past year, and I'd love to see it continue to progress over the next years that I'm still around here.

Events

Attendance at student talks has increased from last year, and I'm hoping to push for more academic events to be introduced into the coming years. Feedback from members seemed to show people enjoyed the non-industry and social events we included on top of the new and innovative industry events we included, such as WICS and GameJam. I hope to see the next committee include new events and ideas wherever they can.

Correspondence

Thanks to our Industry Officer, we brought in a record-breaking amount of sponsorship income this year, and we've put that money straight back into the services we provide our members. Along the way, we also had some interesting interactions with a few of the sponsors we brought on. I won't name names, but the next committee will know exactly who they are. One unexpected upside of the extra funding is that we can now be pickier about who we partner with, and comfortably turn down companies that don't line up with what UQCS is about.

Committee

Meetings

Organising meetings this year, especially in-person ones, was harder than it should have been, mostly because of personal circumstances on my end. For next year, I'd recommend locking in a regular weekly meeting time that can be cancelled when it needs to be. It makes planning far easier, and saves everyone from filling out a When2Meet twice a week.

Ticketing

We also reintroduced a ticketing system this year, using Trello alongside a Discord channel for media requests. Trello worked well at first, but since almost all of our organisation and discussion already happens on Discord, having a separate platform meant it fell out of use pretty

quickly. Going forward, I'd suggest dropping Trello entirely and expanding the Discord ticketing system to every team.

Structure

Over my two years in the society, there have been ongoing issues with the General Executive role and with the lack of manpower available to run our large (and growing) number of events. I believe, as do most of the current committee, that the General Executive role has lost its meaning. The society no longer really needs people hopping between general tasks.

Instead, I recommend that next year's committee has no General Executive positions, and five Officer positions: Competitions Officer, Social Officer, Media Officer, Industry Officer, and Infrastructure Officer. The work General Executives used to pick up would be handled by subcommittees instead. Plenty of clubs and societies across Australia already run this way, and it lets people choose the work they want to do and come and go as they need to. With four resignations from positions this year and several last year (all for various reasons), I think this has become a necessity.

Closing Remarks

I'll close with some statistics from the year on Discord and elsewhere and some specific "thank you"s to some people particularly close to my heart.

From the beginning of this committee, 16th of October 2025, to now, we have had

- 72 messages starboarded
- 229,529 messages sent
- 326 messages blocked in #admin-alerts
- 26 committee meetings
- and more alcohol drunk by me than I would like to admit

Firstly, I would like to thank Zain. Despite you calling me fat in your speech (fuck you), you've been an incredibly supportive and helpful friend. If I'm being honest, I probably wouldn't have gotten through this year without you being an annoying fucker the whole time, so thank you dearly. Don't forget, you're here forever, and I'll be seeing you here next year too.

Next, thank you to my amazing Treasurer (and mini Secretary), John. You saved my ass logistically and time-wise on more occasions than I can count this year, and I'm truly appreciative of your constant attention to detail and care for your friends. Thank you, and I BETTER see you here next year as well.

Thank you as well to all of my officers and other committee. It has been truly a blessing to be able to see you grow in your roles, especially Tyreece after being thrown into it midway through the year, and I'm truly proud of every single one of you for how far you've come.

And finally, thank you to my girlfriend, Riley, because I couldn't have done it without you.

And with that, I'll conclude my time with some wise words from Tay Manderson, someone who has helped me a lot throughout this past year, "It's a beautiful thing to see UQCS continuing to thrive and grow and change year on year, and all of you are part in making this weird student society what it is - committee and members alike. It's so much more than just the society for computer stuff, it's a genuine community, and it ends up being one of the most important parts of some people's entire university experience - it was for me. Keep showing up, keep putting the effort in, kill the part of you that cringes, be gay, do crimes, starboard whenever April

says something freaky, roast resumes, time's just a construct of human perception, and most importantly, be the change you wish to see."

Thank you, and good luck to the next committee.

April Kidd

UQCS Treasurer's Report 2026 - John Pioc

Financial Year Breakdown

Trading Income	
Sales of Tickets	15,257.15
Grants	2,551.52
Annual Sponsorship Payment	31,519.88
Joint Event Reimbursement	3,686.01
Membership Fees	916.50
Event Prize Sponsorship	2,751.33
Sundry Income (Reimbursements for incorrect payments)	2,011.31

Net Profit	**(117.79)**

Treasurer's Remarks

2026 was an amazing financial year for UQCS.Our total trading income reached $\$56,682.39$ (less the sundry income) which is significantly higher than previous years: $\$34,001$ (2025), $\$29,673$ (2024), $\$37,610$ (2023). This increase in spending power allowed us to exercise our yearly goal to run more UQCS events, as well as increase their quality of life via better catering, prizes, lower ticket prices, etc.

Additionally, we reached $\$58,811.49$ in expenditures this year which is also significantly higher than previous years: $\$34,207$ (2025), $\$28,976$ (2024), $\$42,292$ (2023).
Looking at the numbers raw it's easy to conclude that UQCS broke even this year with only a loss of $117.79. I'd like to point out however that there is still an outstanding payment from UQ Ventures of A$500 and another payment came in from WiSA late ,$1285.05, as I invoiced late (my fault). With

those in consideration, I'm happy to say that UQCS has made a profit this year! We also still have the $\$17,000$ in reserves which we are saving for a rainy day.

We also passed audit which was facilitated by the wonderful Glen from Audit Right. Overall we had a very good year. All things considered I was very happy with the way things were run this year and I believe we made a genuine and significant effort to foster a safe, fun and inclusive community for our members.
I will also note that in the industry officer's report, it lists the total revenue collected from sponsors in 2026 is $\$35,301.21$ whilst the revenue presented in this report is only $\$31,519.88 + \$2,751.33 = \$34,271.21$. The reason for this difference is because the window for 2026 is calculated between the 1st of September, 2025 to the 31st of August, 2026. The aforementioned UQ Ventures hackathon sponsorship of $500 only came through on the 21st of October (past the window), and I also didn't count the CodeJam sponsorship of $530 towards the totals as these were given out by IMC trading as gift cards directly to participants. Adding these two outstanding amounts to my total, we get $\$34,271.21 + \$500 + \$530 = \$35,301.21$ which is the exact figure listed on the industry officer's report.

Furthermore, I'll also note some recommended changes for the next treasurer and how they can better handle the societies' finances going into 2027:

- I would encourage the next treasurer to shop around for different manufacturers/printers for our society merchandise. I believe we are currently paying way too much and can definitely find a better deal if we looked around.
- I've kept a seperate excel sheet that tracked every expenditure and budget the society made across different events and categories which I will provide to the next Treasurer. This is something that hasn't been done before. You can use this as a benchmark for future events to gauge how much the event historically costed the society, and I encourage you to at least try to spend less. I wouldn't necessarily say we spent way too much on our events this year, but if we can save money here and there then we can allocate more funds somewhere else.
- This one's more outside the purview of the society's finances, but as a general point of feedback I'd like to see more women join the committee next year. I can almost bet that the distribution of men/women in the UQCS committee doesn't represent the true distribution of men/women studying Computer Science/Software Engineering/Information Technology (and related disciplines), which signals to me that we aren't doing enough to promote a inclusive environment. I've actually seen this in practice with women I've spoken to in person labelling UQCS as a "boys club". I'll be honest I don't really know yet how we can solve this, but it's still worth bringing up and thinking about.

Personal Statement

I'm very very very grateful and happy that I was chosen to be UQCS's Treasurer this year. I've been involved with the UQCS community and events since my first year (2024) and without a doubt, the society has definitely played a massive role in shaping my personal, university and professional life. Through this role (not to mention it being my first society role ever) I've made heaps of new friends and was fortunate enough to facilitate the joy and excitement of attending a UQCS event to our members, as

past committee members have done for me.

A few names I'd like to briefly shoutout: Thank you Zain for mentoring me and empowering me professionally and academically, as well as supervising over me to make sure I'm being the best Treasurer I possibly can be. Thank you April for keeping me grounded and providing youthful energy and charisma to the committee. Thank you Jevi for bringing in heaps of money for the society and allowing us to run awesome events for our members, as well as fancy dinners for committee bonding nights. Thank you Clare for doing the arguably most gut wrenching and anxiety-harboring job, that is booking event venues and catering. Thank you Tyreece for locking in this year in media and stepping up, as well as bringing the committee a good laugh because you're so dopey. Thank you as well to our general committee Ryan, Sean, Hayden, William, Jamie, Gideon and Suvin for being our minions when we needed you guys. I'd also like to mention and say thank you to Mary Barrell who put in heaps of work towards the society but was never officially a committee member, I hope you know your efforts aren't unnoticed. I'm glad to call you all friends and have enriched my university experience.

Finally, thank you to our UQCS members as without you guys there would be no UQ Computing Society.

Sincerely,
John Pioc
UQCS Treasurer

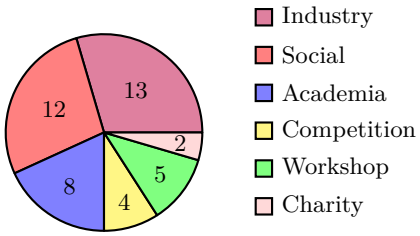

UQ Computing Society
2026 Events Officer's Report

Clare Johnston

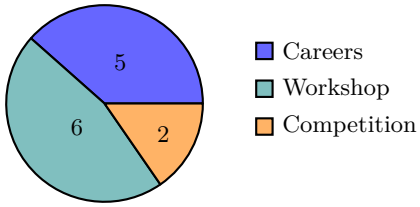

October 2026

To put it simply, this year was very eventful (pun intended). We went from 29 events in 2025 to 44 in 2026, which meant running roughly two events a week for most of the semester. Behind every one of those was a room booking, a catering order and a lot of messages and I'm proud of how much we managed to pull off.

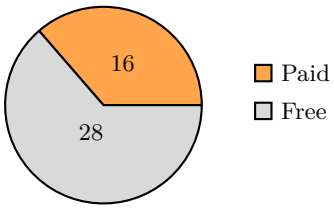

Events

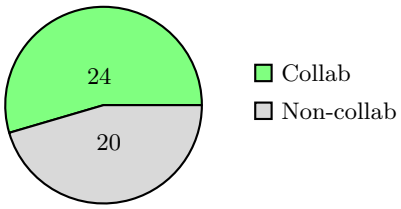

Events by type

Industry events by type

Paid vs free

Collab vs non-collab

Industry

Industry events made up the largest share of our calendar. They fell into three categories: careers events, interactive workshops and competitions. Together, they gave members the chance to learn new skills from industry professionals, explore potential career paths and test their abilities in a competitive setting.

Social

This year we introduced a range of new social events:

- Bouldering and Beers
- Bowling and Beers
- Games Night

- Programming and Pancakes

These events gave members a way to connect with classmates outside the classroom and helped newer members build friendships within the society. We also partnered with other societies for larger events such as Science Ball and the UQ SKIRTS x EBESS x UQCS Ball.

Academia

Our academic events focused on peer learning. The student talk series gave members the opportunity to share their knowledge and learn from one another. Events such as What is CS?, the First Year Panel and the BioTech Interdisciplinary Research & Networking Night connected students with experienced peers and researchers to discuss study and career pathways.

Competitions

This year we ran two hackathons, including GameJam, a successful new addition to our calendar. Both GameJam and the UQCS Hackathon sold out and received positive feedback from participants. Hackathons are historically challenging events to organise, and I'm proud of how smoothly both ran. We also reduced CodeJam ticket prices to $5, making the event more accessible to members.

Workshops

Most of our non-industry workshops served as preparation for upcoming competitions, including How to CodeJam, How to GameJam, the GameJam Game Dev Workshop and How to Hackathon/How to GitHub. These sessions lowered the barrier to entry for first-time participants, helping them arrive feeling confident and prepared. We also ran Getting the Internship/Grad to support members through the application process.

Charity

This year we held two charity events: Charity Poker and an R U OK? Day run. Both were a great way to give back to the community while bringing members together and I hope to see more charity events in the future.

Recommendations for next year

This year we had a good mix of events, but I'd like to see more lowkey social events next year, particularly towards the start of each semester. Casual, low pressure settings make it easier for members to get to know each other, especially newer members who might not know anyone yet.

As always, book rooms/venues as early as possible. Having rooms locked in early takes a lot of stress out of planning.

Thank You

I'd like to say thank you to the committee for making everything possible this year. Thank you to the general committee: Ryan, Sean, Chris, Gideon, Jamie, Hayden, William and Suvin for always helping out at the events. Thank you to Tyreece for stepping up as media officer in a time of need and doing a great job. Thank you to Jevi for being such a diligent industry officer and bringing in the financial support that made our events possible. Thank you to April for always having the committees back. Thank you John for your effort and hard work you put in this year. You were a pillar the committee needed. Thank you Zain for all the outreach you did to build connections with other clubs and the guidance you offered the committee. And thank you to the members who make UQCS such a great community.

Clare Johnston
UQCS 2026 Events Officer

Media Officer Report

Foreword: This is the second consecutive year in which the Media Officer elected at AGM/SGM has resigned before completing their term. I believe this reflects a miscommunication of the responsibilities the role entails and an underestimation of how much work the position requires. My goal has been to reassess and clearly redefine the expectations and responsibilities of the Media Officer role.

Overview

I was appointed partway through the year. Previously, the Media Officer functioned primarily as the society's graphics producer, but initiatives have been implemented to improve the overall direction of the role:

- **Media Subcommittee:** Originally intended to assist with producing the society's graphics, the subcommittee has transitioned into becoming a core part of UQCS's media output. The Media Officer will create tickets and subcommittee will assign themselves, have open communication within the ticket and have the ability to work collaboratively with the relevant committee members. Media Officer oversees the progress and gives subcommittee direction, edits initial drafts and provides subcommittee with resources. This restructure means we can concurrently work on multiple projects, spanning graphics, reels, posts and static material, improving the media output of the society.
- **Media Schedule:** Included alongside the Events Calendar to set clear media deadlines for each event. It has since become an essential planning tool, keeping communication consistent and the team accountable.

The Media Officer remains the primary producer of graphics, both for social platforms and for static material such as the UQCS website, First Year Guide and Sponsorship Prospectus. However, with events increasing from 29 in 2025 to 44 in 2026, we determined a restructure was necessary to keep up with the demands of the role. The change was also shaped by my own experience: at one point I produced 10–12 graphics in just two weeks, an unsustainable workload I was determined not to pass on to the next Media Officer.

The new media subcommittee brings together a range of skills (graphics, photography, videography, art and merchandise), all coordinated within the media portfolio. The Media Officer is still responsible for meeting deadlines and maintaining quality, but leading a team that shares the workload frees them to focus on the bigger picture: deciding where time and resources are best spent, and planning how to build engagement across an evolving member base.

UQCS Members

> "The biggest problem I see is that UQCS doesn't know what its members want, and therefore I don't see how anybody can say that committee is or isn't catering to the member base."
>
> — alegs, `#uqcs-meta`

Marketing to UQCS members is challenging because the member base is so diverse. Computer science attracts people with a wide range of interests, and our goal is to maintain UQCS's core identity and community while also making the society open to everyone. This creates a balancing act in the events we run and how we promote them: we need to retain our core demographic while drawing in new people. Technical events such as student talks, Hackathon, GameJam and CodeJam anchor the community, while more industry-focused or niche events broaden our reach. This focus is reflected in both where we post and what we post on each platform:

- **Instagram:** Our main channel for growth. It promotes events to prospective and newly joined members, introducing them to the society as they enter the community.
- **Discord:** The heart of UQCS. It is where our community lives day to day. Beyond hosting committee planning and organisation, it gives members a direct and personal line to the committee and the wider community.
- **LinkedIn:** Our window to industry. It showcases the society's success through its events and demonstrates our ability to collaborate with industry partners.
- **YouTube:** An archive of our technical talks and hackathon presentations, serving as the home for our technical audience.

Social Media Metrics

Focus was placed on Discord, Instagram, LinkedIn and YouTube as our primary media outlets, with Facebook declining in use amongst our members. This was built off the decision of centeralising our social media platforms and made everything easier to track. We have also engaged with EAIT Newsletters for specific events, such as What is CS?. Note: Analytics were taken on 1st October, 2026.

- **Discord:** Has become our primary form of communication with members, used for advertising events and opportunities, as well as communication from our admin team. We have used Discord events, as well as Humanatix, to gauge interest for events and to coordinate our marketing strategy.

  Stats provided by Discord's Server Insights: with approximately 750 monthly visitors and 103 communicators, we gain roughly 43 new members per month, of whom around 10 become new communicators, and we have a 72.2% new member retention rate. This figure is also influenced by Hackathon and GameJam periods, but has otherwise remained consistent.

- **Instagram:** Also a primary form of event advertisement and communication with our members; the majority of our collaboration posts, social media reels and event advertisements are pushed to Instagram.

  Stats provided via Instagram Business Insights: over the last 90 days, we received approximately 483,000 views, split 45.2% from followers and 54.2% from non-followers (0.6% Facebook). This breaks down as 340K views from posts (164K followers, 174K non-followers, 3K Facebook), 111K from reels (25K followers, 85K non-followers) and 32K from stories (29K followers, 2.8K non-followers). Estimated total of 140 posts made this year.

  Top 5 Collaboration Posts:

  - UQ Science Ball Met Gala Announcement (17.8K)
  - UQ HFN Engagement Reel (16.2K)
  - UQ Las Vegas Ball Recap Post (13.8K)
  - Mega Launch Announcement Post (12.9K)
  - R U OK? Fun Run Reel (12.8K)

  Top 5 UQCS Posts:

  - What is CS Promotional Reel (14.3K Views, 164 Likes, 9.2% / 90.8%)
  - 2026 UQCS Sponsor Announcement (13.8K Views, 78 Likes, 45.3% / 54.7%)
  - Deeptech Innovation Internship (12.3K Views, 120 Likes, 19.6% / 80.4%)
  - GameJam Recap Post (7.6K Views, 143 Likes, 49.1% / 50.9%)
  - Hackathon Recap Post (5.7K Views, 108 Likes, 67.5% / 32.5%)

  Collaboration posts have been effective for growth, reaching new audiences and strengthening the society's online presence. The top five UQCS posts below were selected by views and likes, as they best represent the society on Instagram.

  Follower count has remained steady (4,669 in 2025 vs. 4,633 in 2026). I attribute this to Instagram's removal of bot accounts and a reduced output of short-form reels. In the latter half of Semester 2 we reintroduced reels, and they have since performed well.

- **LinkedIn:** From last year, a goal was set to increase our engagement on LinkedIn with sponsors and industry collaborators. We made 34 posts this year, which performed well: 47,955 impressions, 579 reactions, and 10 comments.

  Top 5 Posts:

  - Optiver Volatility Lab (6.1K impressions, 24.9% CTR)
  - UQCS Hackathon (5.2K impressions, 42.2% CTR)
  - UQCS GameJam Video (4.2K impressions, 5.5% CTR)
  - UQCS GameJam Prize Winners (3.7K impressions, 36.0% CTR)
  - UQCS Industry Panel (2.2K impressions, 65.4% CTR)

With this growth, LinkedIn has become an effective way to reach sponsors about our events and for members to showcase their achievements on the platform, as well as a strong channel for the society to advertise itself and position itself as a valuable sponsor collaborator.

- **YouTube:** Has been primarily used for past livestreams and event recordings; no dedicated long-form content has been produced exclusively for the platform, although it has experienced growth (9.7K Views, 649 Watch Time (hrs), +78 subscribers), bringing the total to 1,096 subscribers.

  Top 5 Posts:

  - Career Launchpad 2026: The Practical Guide to Industry (449 Views)
  - Generics with Hayden Brown (321 Views)
  - How to Hackathon 2026 (299 Views)
  - Hackathon 2026 - Presentations and Awards (276 Views)
  - Algebraic Effect Systems with Luna Borella, Lightning Talks Double Feature (275 Views)

Static Material

- **First Year Guide:** This project aimed to provide first-year students with general advice and is available via the website. It serves as our main form of outreach during O-Week and Market Day, offering a extensive summary of the society, including general information, academic advice, UQ tips and tricks and a further avenue to advertise sponsors. Carried over from last year, this has been a rewarding project and we would like to continue revising it annually.
- **2027 Sponsorship Prospectus:** Although this is a primary responsibility of the Industry Officer, the Media Officer worked in collaboration to ensure the graphic was well formatted and was responsible for sections regarding advertisement and social media presence.

Reflection

For the next Media Officer, I recommend undertaking a rebrand of the UQCS website alongside Infra and Industry, which has been neglected in recent years, to restore it as a key tool for sponsor outreach and member engagement. Developing a consistent design standard for graphics and posts would also address past inconsistency and give our channels a cohesive identity rather than the feel of spam. Underpinning both is the ongoing balancing act at the heart of the role, strengthening the existing community while continuing to welcome new members into UQCS. Hopefully the purpose of each social platform has been addressed but always look for new ways to reach members and build the community.

Thank You

I have tried to redefine what it means to be Media Officer this year, which has been difficult but has been possible due to the support of committee and T6. Especially joining late, their was an expectation set and I'm glad to say this has been an amazing experience and I'm looking forward to not only what comes next for the role, but for the society as a whole! Thank you media subcommittee, general committee and T6: Zain, April, John, Jevi and Clare.

Tyreece Paul
UQCS 2026 Media Officer

UQ Computing Society
2026 Industry Officer's Report

Jevi Waugh

October 2026

2026 at a Glance

Sponsorship Growth

During my term as Industry Officer, UQCS achieved its highest annual sponsorship income since 2021, a 43% increase from last year. We also expanded our industry network, diversified our sponsors and delivered more opportunities for students. We grew from 10 industry sponsors in 2025 to 13 in 2026, welcoming 7 new companies while re-establishing relationships with 6 previous industry partners. Industry outreach also expanded significantly. In 2025, UQCS contacted 43 companies out of a target of 67, achieving 64.2% of its outreach target. In 2026, we contacted 153 companies out of a target of 218, achieving 70.2%. This represents a 256% increase in the number of companies contacted, reflecting a considerably more ambitious approach to industry engagement.

The Art of Selling

One of my priorities this year was improving how we present UQCS to potential sponsors. I revised our sponsorship prospectus, adding more statistics to better showcase the society's achievements and demonstrate the value we offer industry partners. I also introduced facilitated outreach to a filtered group of high-achieving Computer Science students for Gold and Emerald sponsors, with enhanced priority outreach reserved for Emerald sponsors. These additions strengthened the recruitment value of our packages and supported a $250 increase across all sponsorship tiers. Ultimately, the goal was to strengthen the value of our sponsorship packages while creating greater opportunities for students.

Outreach & New Industry Relationships

This year, I restructured our approach to industry outreach by distributing cold-calling responsibilities among myself, John, Ryan, Sean, and Suvin. I assigned them companies we had not previously engaged with, while I personally focused on larger companies and strategic partnerships. A huge thank you to these four for their contributions.

My role involved much more than simply sending emails. From November 2025 to March 2026, I spent considerable time making calls, arranging meetings, following up with companies, negotiating sponsorship agreements and maintaining relationships. Some partnerships required multiple meetings, others ended in rejection, and some discussions even kept me at a bar until midnight. Securing sponsorships takes persistence, patience and a willingness to put yourself out there.

Ultimately, this approach allowed us to expand our industry network while dedicating more time and attention to building meaningful, long-term relationships.

Sponsorship

Stream 1: Industry Sponsorship

Our sponsors represent a diverse range of industries, from trading and software to quantum technology and aerospace.

Tier	Company	Sector	Amount
Emerald	Jane Street	Trading	$3,250.00 AUD
Emerald	*Tanda	HR Technology	$3,250.00 AUD
Emerald	*CyberMetrix	Cybersecurity	$3,250.00 AUD
Gold	*Citadel Securities	Trading	$2,750.00 AUD
Gold	*Quantum Australia	Quantum	$2,750.00 AUD
Bespoke Gold	*Atlassian	Software	$2,500.00 AUD
Silver	Oracle	Software	$2,250.00 AUD
Silver	IMC	Trading	$2,250.00 AUD
Bronze	VivCourt	Trading	$1,250.00 AUD
Bronze	*ApexFinCap	FinTech	$1,250.00 AUD
Bespoke	Boeing	Aerospace	$1,538.46 AUD
Bespoke	Optiver	Trading	$1,250.00 AUD
Bespoke Digital	*getcracked.io	Education	$981.42 AUD
		Total	**$28,519.88 AUD**

*getcracked.io originally paid $768.00 USD with a 1.27 conversion. * New industry partner secured in 2026.*

Stream 2: CodeJam Sponsorship

I increased the CodeJam prize pool by $100 compared to last year, from $430 to $530, offering greater rewards and value to participating students.

Sponsor	Prize / Award	Amount
IMC	Gift Card: 1st Place	$250.00 AUD
IMC	Gift Card: 2nd Place	$100.00 AUD
IMC	Gift Card: 3rd Place	$80.00 AUD
IMC	Best First Year	$100.00 AUD
	Total	**$530.00 AUD**

Stream 3: Hackathon Sponsorship

I also secured additional prize sponsors with Zain's help, bringing Hackathon's total prize pool to $3,250 which had never been attempted before.

Sponsor	Prize / Award	Amount
RiseOS	Best Overall	$2,000.00 AUD
Ventures	People's Choice	$500.00 AUD
Nuaxion	Best Game	$250.00 AUD
Spatial Synergy	Best Community	$250.00 AUD
*Flexify	Best Interdisciplinary	$251.33 AUD
	Total	**$3,251.33 AUD**

**Flexify originally paid in USD.*

Sponsorship Streams	Amount
Industry Sponsorship	$28,519.88 AUD
Hackathon Sponsorship	$3,251.33 AUD
CodeJam Sponsorship	$530.00 AUD
Total 2026 Sponsorship	**$32,301.21 AUD**
Oracle 2025 Outstanding Sponsorship Recovered	$3,000.00 AUD
Total Revenue Collected in 2026	**$35,301.21 AUD**

When I first took on this role, my goal was never simply to bring in as much money as possible. I wanted to build relationships with companies and turn those relationships into opportunities for our students.
That being said, it's still pretty satisfying to see the numbers grow. We achieved a 43% increase in sponsorship revenue compared to last year, expanded our industry sponsor portfolio and significantly increased our social partnerships. More importantly, we built a stronger foundation for the next committee to continue developing.
Ultimately, I would rather be remembered for the opportunities we created than the amount of money we raised.

How it Compares

Year	**2026**	2025	2024	2023	2022	2021	2020
Total ($)	**32,301.21**	22,581.66	15,500.00	22,467.25	30,721.74	33,217.32	12,276.15

Oracle's 2025 sponsorship has been intentionally excluded to accurately reflect income received during the year. UQ Union grants and the estimated monetary value of Red Bull Wings provided as in-kind sponsorship have also been excluded from the total sponsorship income.

Social Partnerships

Social sponsorship grew by 200% compared to 2025, tripling our portfolio from two to six partners and expanding the range of benefits available to UQCS members.

As Industry Officer, I wanted social partnerships to offer practical value. Elohim Studio supports event photography, CR8 assists with branding, and Ciao Bello provides food support. Jetts Fitness and Urban Climb promote healthier, more active lifestyles, while Red Bull supports Hackathon through Wings. My goal was to diversify our partnerships and ensure each contributed something meaningful to UQCS.

Social Sponsorship Comparison

Sponsor	2025	2026
Red Bull	✓	✓
Ciao Bello	✓	✓
CR8		✓
Jetts Fitness		✓
Elohim Studio		✓
Urban Climb		✓
Total	**2**	**6**

We also secured 430 cans of Red Bull through the Wings program to support our Hackathon participants which was significantly more than last year.

Key Industry & Academic Events

High Frequency Networking

Co-hosted with UQLIT and EBESS, HFN brought together 13 companies, with UQCS contributing connections to 9, including shared industry relationships.

Industry Representation	Companies
UQCS	Citadel Securities, Boeing, Tanda, Oracle, Microsoft
Shared Relationships	Jane Street, Optiver, Atlassian, VivCourt
Partner Societies	Fenwick, NTI, Deswik, DFR

- **Quantum Careers Night**

  Quantum Careers Night was a successful collaboration between societies, with particularly strong participation from UQCS students.

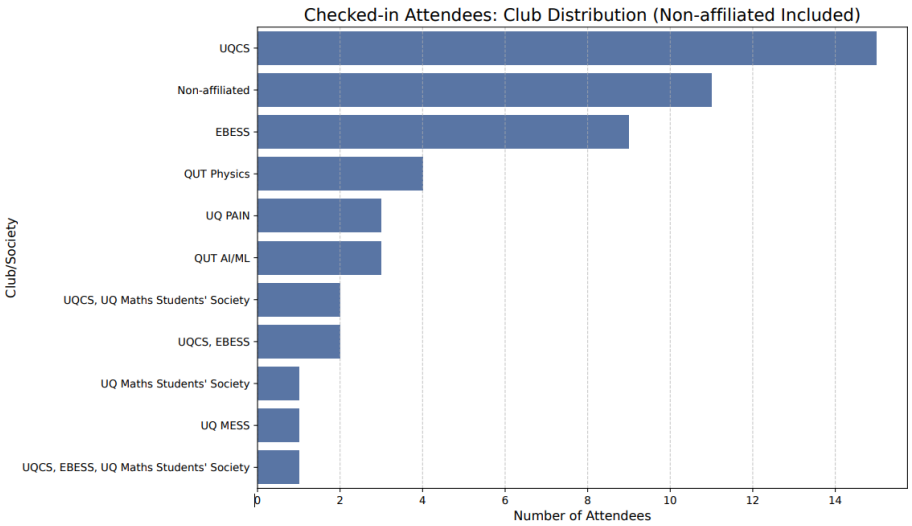

Figure 1: Checked-in students at QCN.

- **Industry Panel** The Industry Panel attracted around 60 attendees, connecting students with industry representatives.
- **Citadel Securities Cryptography Challenge** Despite being held a day after HFN, the event attracted 51 registrations and approximately 30 attendees.
- **What is CS?** Using academic connections, I brought together researchers, lecturers, industry representatives and students, securing nearly 80 registrations.

Passing the Torch

To my knowledge, I'm the first Industry Officer to revise prospectuses at both ends of my term.

As UQCS grows, so do our responsibilities and the need for support. I'm proud of the standards we've set and hope my successor takes them even further.

Goals for 2027

- **Digital Infrastructure:** Align the website with our prospectus and introduce digital membership cards for social sponsor benefits, supported by a dedicated Infrastructure Officer.
- **Partnerships:** Money isn't the goal. What matters is having companies that genuinely show up for our students and give them opportunities.

Personal Statement

My journey with UQCS began rather unexpectedly. It was Zain and Masham, whom I met in our capstone course (DECO3801), who encouraged me to apply. Given my experience in leadership and my enjoyment of meeting people, Industry Officer seemed like a natural fit. Balancing this role alongside full-time university studies and three jobs was certainly challenging. I've always believed in leading by example, setting high standards for myself and surrounding myself with people who challenge me to become better. I hope my leadership reflected that philosophy and encouraged those around me to aim just as high. Looking back, I'm proud of what we achieved, although none of it would have been possible without the people around me.

I'd particularly like to thank Masham, not only for encouraging me to take on this role in the first place, but also for her support and encouragement throughout the year. A special thank you to Zain for encouraging me to join and sharing my rather unique sense of humour; Clare for being genuinely lovely to work with and helping deliver our industry events; Tyreece, who, like me, is also Mauritian, for helping us fulfil our marketing commitments to sponsors and John for providing a diplomatic perspective that often balanced my more direct approach. A particular thank you to Ryan and Sean for supporting our industry outreach, and to April and the rest of the committee for their contributions throughout the year.

I would have loved to continue as Industry Officer, but my next chapter hopefully takes me to the Technical University of Munich (TUM) in Germany. To my successor, I hope you continue building on what we've achieved and set even higher standards.

For someone who never planned to join the committee, it's been quite a year.

> "**It's not who I am underneath, but what I do, that defines me.**"

Auditor's Verification Statement for the year ended 31 August 2026

To the members of University of Queensland Computing Society

I have sighted the entity´s financial records for the year ended 31 August 2026, and the financial records show that the entity has book keeping processes in place to adequately record the entity´s income and expenditure and dealings with its assets and liabilities.

Basis of Accounting and Restriction on Distribution

Without modifying our opinion, we draw attention to Note 1 to the financial statements, which describes the basis of accounting. The financial report has been prepared to assist University of Queensland Computing Society to meet its reporting requirements to University of Queensland Union. As a result, the financial report may not be suitable for another purpose.
